```python
a=int(input("enter number"))
b=int(input("enter number"))
c=int(input("enter number"))
if a>=b and a>=c:
    print("a is greater")
elif b>=c:
    print("b is greater")
else:
    print("c is greater")
```

enter number10

enter number50

enter number20

b is greater
